Projects & Competitions

Word Editor (Project 2) | Git, Java, JavaFX, Maven - <https://github.com/12xsunx12/cop4027-projects>

October 2023

- Created a Word Editor that can take typed text and save it to a local directory
- Features spell checking capabilities. Matches each word to a HashTable loaded with a dictionary of 80,000 words

International Collegiate Programming Contest (ICPC) | Linux, C++

March 2023

- 12 question coding competition featuring many colleges across the United States.

National Cyber League | Blue & Red, Open-Source, Encryption, Pen-Testing

November 2022

- Remote/Online Cyber competition; some of the tests were breaking encryptions, pen-testing websites, man-in-the-middle attacks, and open-source reconnaissance.

Iten-Wired Pensacola | Blue Team, Reconnaissance, Cyber Range

September 2022

- Teams of three are introduced to an already hacked system. Their goal is to find out how it happened, who did it, where it's from, and finally prevent it from happening again.
